# Esipuhe

"Moottoriajoneuvot 1991" sisältää tietoja 31.12.1991 rekisterissä olleista ajoneuvoista ja vuoden 1991 ensirekisteröinneistä. Aikasarjassa on esitetty tietoja rekisteröityjen ajoneuvojen määrän kehityksestä v:sta 1922, jolloin autojen ja moottoripyörien rekisteröinti tuli pakolliseksi. Moottoriajoneuvot-julkaisu on ilmestynyt vuodesta 1969.

Tämä julkaisu on lähes samansisältöinen kuin viime vuoden vastaava julkaisu. Taulukkoon B (autot iän mukaan) on lisätty vähäpäästöisten autojen määrät autokannasta ja ensirekisteröinneistä.

Ajoneuvotilaston valmistusta on johtanut yliaktuaari Arto Luhtio. Julkaisun laadintaan on osallistunut Irmeli Segerholm. Tietotekniikasta on vastannut atk-suunnittelija Eija Vaurio.

## Preface

*"Motor Vehicles in Finland 1991 (Moottoriajoneuvot 1991)" is a publication of Statistics Finland containing information about vehicles on the vehicle register at the end of 1991 and about new vehicles entered in the register during 1991. The publication also contains time series on the stock of vehicles since 1922.*

*The data content is much the same as in the previous publication. Table B (automobiles by age) has been supplemented with information on exhaust standards for the stock of vehicles and new vehicles registered.*

*The compilation of the motor vehicle statistics has been co-ordinated by Arto Luhtio. The publication has been prepared by Irmeli Segerholm. Data processing has been the responsibility of Eija Vaurio.*

# Katsaus: Rekisterissä olevat ajoneuvot 31.12.1991 ja ensirekisteröinnit vuonna 1991

Vuoden 1991 lopussa oli maassamme rekisteröityjä autoja 2 218 067, joista henkilöautoja 1 922 541. Tämä tekee keskimäärin 382 henkilöautoa tuhatta asukasta kohti. Kaikkiaan rekisterissä oli ajoneuvoja 3 043 461. Rekisterissä olevien autojen määrä pieneni ensimmäistä kertaa sotien jälkeen. Sekä henkilö-, linja- että kuorma-autojen rekisteristä poistuma oli suurempi kuin ensirekisteröintien määrä.

## Alueittaiset autotiheydet

Ahvenanmaa on Suomen autoistunein maakunta, siellä henkilöautoja on 518 tuhatta asukasta kohti. Seuraavina tulevat Vaasan lääni luvulla 414 ja Turun ja Porin lääni luvulla 408. Vähiten henkilöautoja on Kuopion läänissä, 360 tuhatta asukasta kohti, toiseksi vähiten Uudellamaalla (368). Eräänä Kuopion läänin alhaiseen autoistumiseen vaikuttavana seikkana voisi olla se, että vuoden 1990 väestölaskennan otostutkimuksen mukaan siellä on lyhimmat työmatkat maassamme, keskimäärin 8,2 km. Työmatkoistahan tehdään henkilöautolla tutkimuksen mukaan lähes puolet (Ototietoja työvoimasta ja työmatkoista 1990).

Vähiten autoistuneita ovat lounaissaaristokunnat, joista Iniössä henkilöautotiheys tuhatta asukasta kohti jää 254:ään, Velkualla 290:een ja Korppoossa 298:aan. Vähiten autoistunut kaupunki on Kaskinen luvulla 325.

Helsinki on maamme kaupungeista suhteessa väestöön toiseksi vähiten autoistunut, luku on 337 henkilöautoa tuhatta asukasta kohti. Myös Tampere 364, Vantaa 377 ja Espoo 379 jäävät autotiheydessä alle koko maan keskiarvon. Turku, 381, lähestyy jo maan keskiarvoa ja Oulu luvulla 398 ylittää sen selvästi.

## Ensirekisteröinnit 1991

Vuosi 1989 oli autokaupan huippuvuosi. Vuonna 1990 vähenivät rekisteröinnit jo selvästi (paitsi erikoisautojen ja moottoripyörien) ja v. 1991 ensirekisteröintien määrä jäi noin puoleen v. 1989 määristä. Vähentyminen oli selvää kaikkien ajoneuvolajien osalta.

## Vähäpäästöiset autot

Vuoden 1991 lopussa oli rekisterissä vähäpäästöisiä henkilöautoja 161 257, mikä on 8,4 prosenttia kaikista. Vuoden ensirekisteröinneistä vähäpäästöisten henkilöautojen osuus kohosi 86:een prosenttiin, edellisvuonna niiden osuus oli melko tarkasti puolet. Ammattimaisen liikenteeseen rekisteröidyistä henkilöautoista vähäpäästöisiä oli 1 515 eli lähes puolet. Edellisvuonna vain joka neljäs ammattimaisten henkilöautojen ensirekisteröinti oli vähäpäästöinen.

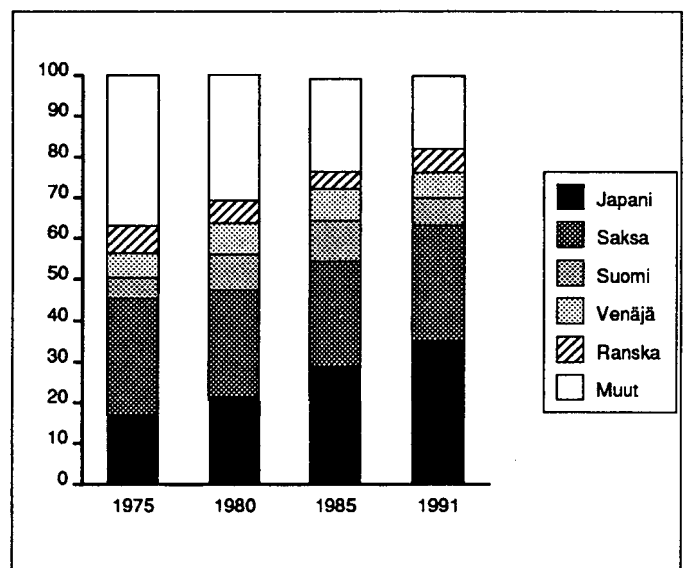

## Ajoneuvot tarkemman tyypityksen mukaan

Henkilöautoista oli maastohenkilöautoja 26 979 (julkaisematon taulukko). Invatakseja oli 386. Kuorma-autoihin sisältyy 2 335 säiliöautoa ja 289 myymäläautoa. Erikoisautoista suurimman osan muodostavat matkailuautot, joita oli 9 534. Paloautoja oli 3 429, huoltoautoja 2 106, nosturiautoja 1 064, ambulansseja 829, ruumisautoja 632, nostokoriautoja 552, hinausautoja 297, eläinlääkäriautoja 253 ja kirjastoautoja 235.

Traktoreista valtaosa on maataloustraktoreita, teollisuustraktoreita oli 4 092, metsätraktoreita 1 898 ja puutarhatraktoreita 1 181. Moottorityökoneita ovat mm. kauha-kuormaajat 9 004, kaivukoneet 2 490, haarukkanosturit 1 978 ja monitoimimetsäkoneet 445.

Perävaunuista suurin osa on kevyitä lähinnä henkilöautojen perävaunuja. Kuorma-autojen varsinaisia perävaunuja oli 26 925. Veneenkuljetusperävaunuja oli 10 259, säiliöperävaunuja 1 673 ja hevosenkuljetusperävaunuja 1 563.

Museoajoneuvoja sisältyy lähes kaikkiin ajoneuvoluokkiin yhteensä 3 282. Eniten on museohenkilöautoja, 2 478 ja museomoottoripyöriä 602.

Henkilöautojen jakaantuminen valmistusmaan mukaan (%) vuosina 1975 - 1991.

# Tuoteseloste

## Käyttötarve

Ajoneuvotilastoa tarvitaan liikenne-, tie- ja kaavoitus suunnitteluun, liikennemääräennusteisiin, liikennelupapolitiikkaan, ajoneuvolainsäädännön kehittämiseen, yrityssuunnitteluun ja markkinatutkimuksiin. Käyttö on sekä valtakunnallista (esim. liikenneministeriö, tiehallitus, yritykset) että paikallista (esim. kunnat). Tietoja käytetään paljon myös kansainvälisissä tilastoissa, esim. YK:n Euroopan talouskomission (ECE) julkaisema Annual Bulletin of Transport Statistics for Europe.

## Määritelmät ja luokitukset

Tilaston määritelmät perustuvat ajoneuvolainsäädäntöön. Muuttajat ja niiden kooditus perustuvat ajoneuvorekisteriin ja luokituksissa (esim. kantavuusluokat) käytetään kansainvälisiä, lähinnä ECE:n käyttämiä ryhmittelyjä.

Ajoneuvoasetuksen mukaan moottoriajoneuvoja ovat auto, moottoripyörä ja mopo. Näitten lisäksi traktori, moottorityökone ja maastoajoneuvo ovat moottorikäyttöisiä ajoneuvoja. Tähän julkaisuun sisältyy tietoja rekisteröintivelvollisuuden alaisista ajoneuvoista. Julkaisun nimi 'Moottoriajoneuvot' ei siten täysin kata julkaisun sisältöä. Julkaisun lukuihin eivät sisälly puolustuslaitoksen käytössä olevat ajoneuvot. CD-rekisterissä olevat autot ovat mukana vuodesta 1982 alkaen.

Yhteisöautoihin sisältyvät yritysten ja muiden yhteisöjen (pl. valtio ja kunnat) omistamat autot.

## Tietolähteet

Tilastokeskus saa ajoneuvokohtaiset tiedot Autorekisterikeskuksen ajoneuvorekisteristä Valtion tietokonekeskuksen välityksellä. Vuodesta 1989 lähtien ei tietoja Ahvenanmaan erillisestä rekisteristä ole saatu konekielisenä. Summatiedot Ahvenanmaan ajoneuvokannasta ja ensirekisteröinneistä on saatu Motorfordonsbyråsta. Toivomme myöhemmin saavamme myös nämä tiedot konekielisinä ajoneuvokohtaisesti.

## Vertailtavuus

Tilaston tiedot ovat suurimmalta osin vertailukelpoisia koko sen tekoajalta.

Vertailtaessa eri maiden tietoja (myös joissain kotimaisissa tilastoissa on tässä epäselvyyttä) on huomattava, että esim. termi moottoriajoneuvo on hyvin epämääräinen, sillä saate-taan tarkoittaa jossain maassa pelkästään autoja tai lisäksi moottoripyöriä tai lisäksi mopoja (Suomi) tai jopa kaikkia moottorikäyttöisiä ajoneuvoja. Erikoisautot sisältyvät muissa maissa valtaosin henkilö- ja tavara-autoihin.

## Peittävyys

Tilasto sisältää kaikki Autorekisterikeskuksen ajoneuvorekisterissä olevat ajoneuvot. Ahvenanmaan tiedot sisältyvät ajoneuvokanta- ja ensirekisteröintiaikasarjoihin (taulukot A, C ja D) sekä taulukkoon 1. Muista jakaumataulukkoista ne puuttuvat vuoden 1989 jälkeen.

## Virheet ja puutteet

Tilaston laatu on sidoksissa ajoneuvorekisterin laatuun. Ajoneuvorekisterissä on jonkin verran puutteellisia ja virheellisiä tietoja. Puuttuvat ja epävalidit merkki- ja valmistusmaakoodit menevät luokkaan 'muu'. Taulukossa 1 eivät koko maan tiedot täysin täsmää kunnittaisten ja lääneittäisten summien kanssa, koska koko maan tietoihin on laskettu mukaan myös puuttuvat ja virheelliset kuntakoodit.

Ajoneuvorekisterin uudistamisen (v. 1989) yhteydessä rekisterin tietosisältö parani huomattavasti. Ehkä merkittävin puute tällä hetkellä on se, että eri päästöstandardit täyttävien autojen erottelu rekisteristä on hankalaa, koska se sisältää vain yhden vähäpäästöisyyskoodin (kyllä/ei).

Rekisterissä olevista tiedoista tästä julkaisusta puuttuvat myös henkilö- ja linja-autojen istuma(ja seisoma-)paikkamäärät (taulukot F ja 2), koska VTKK ei pystynyt toimittamaan tietoja niistä v. 1988 jälkeen. Toivomme saavamme ne jatkossa taas mukaan.

## Julkaisemattomat taulukot ja aineiston saata-vuus

Julkaisemattomista taulukoista saa maksullisia valokopioita. Tärkeimpiä julkaisemattomia tietoja ovat:

- kunnittaiset ja lääneittäiset tiedot käyttövoiman (bensii-ni/diesel) mukaan
- ajoneuvot tarkemman tyypityksen mukaan ja merkkien mukaan (kaikki merkit)
- ajoneuvot lajeittain käytön ja käyttövoiman mukaan
- autot ja moottoripyörät iän mukaan (vuositasolla) ja ajoneuvot hallintasuhteen mukaan

Vuoden 1991 ensirekisteröinneistä on tulostettu samat tiedot kuin ajoneuvokannasta. Tämän julkaisun taulukot 1-6 samoin kuin edellä mainitut julkaisemattomat taulukot ovat siis saatavana myös ensirekisteröinneistä.

Tilaukset: Irmeli Segerholm, p. 90-1734 3219.

Tilastokeskus tuottaa asiakkaan tilauksesta maksullisia erikoistaulukkoja. Ajoneuvotiedot on mahdollista yhdistää myös muihin tietoihin (esim. yritysrekisteri, väestö- ja asuntotiedot, liikenneonnettomuustiedot). Tietoja Tilastokeskuksesta luovutetaan vain summattomina, ei yksikkö-tasolla. Ajoneuvorekisterin nimi- ja osoitetietoja myy Val-tion tietokonekeskus.

# Review: Stock of registered vehicles at the end of 1991 and first registrations in 1991

At the end of 1991, Finland had 2,218,067 registered automobiles, 1,922,541 of them passenger cars. The average rate of car ownership was 382 per 1,000 population. There were 3,043,461 registered vehicles in all. For the first time since World War II, the number of registered automobiles decreased in Finland. Deregistrations for cars and buses exceeded the number of first registrations.

## Car density

In terms of car density, the Autonomous Territory of the Åland Islands (for which the Finnish name Ahvenanmaa is used in the tables) leads with 518 cars per 1,000 population. Two other west coast provinces, Vaasa (414) and Turku-Pori (408), rate next. The province of Kuopio (360) and the province of Uusimaa around Helsinki (368) have the lowest car densities.

There are few municipalities where more than half population have the use of a passenger car, i.e. where there are more than 500 passenger cars per 1,000 population. The lowest car densities are in municipalities situated in the southern and the western archipelago. In these municipalities, car density is below 300 per 1,000 population.

Of large cities, Helsinki has the lowest car density rate, 337. Most of the other large cities also fall short of the average rate: Tampere has 364, Vantaa 377 and Espoo 379 cars per 1,000 population. The rate for Turku is close to the average, 381. With a car density rate of 398, Oulu is the most motorized of the large cities.

## First registrations

In 1989, the number of first registrations reached an all time high for passenger cars and most other vehicle categories. In 1990, the number of first registrations fell from the previous year, except for special automobiles and motor cycles. The number of first registrations in 1991 was only half that in 1989. The number of first registrations decreased clearly for all types of vehicle.

## Cars by exhaust standards

At the end of 1991, there were 161,257 passenger cars (8.4 per cent) meeting the Finnish exhaust emission standards. For first registrations the percentage of low-exhaust cars was 86, compared with 50 in 1990. For first registrations of cars operated for hire or reward (mostly taxis), the percentage increased from 20 in 1990 to almost 50 in 1991.

## Vehicles by type of use

Passenger cars include 26,979 jeeps and other terrain automobiles and 386 taxis for the handicapped. Lorries include 2,335 tankers and 289 mobile shops.

The largest group of special automobiles is composed of 9,534 motorhomes. Other special automobiles include 3,429 fire-brigade vehicles, 2,106 repair trucks, 1,064 mobile cranes, 829 ambulances, 632 hearses, 552 lift-body lorries, 297 break-down lorries, 253 veterinarian lorries and 235 mobile libraries.

The number of agricultural tractors also includes some other tractors: 4,092 industrial tractors, 1,898 forest tractors and 1,181 garden tractors. Tractors for semitrailers are included in heavy lorries. Motor-driven industrial equipment includes, for instance, 9,004 bucket loaders, 2,490 excavators, 1,978 forklifts and 445 timber harvesters.

Most trailers are light trailers for cars. There are 26,925 heavy trailers for articulated vehicle combinations and 5,821 semitrailers. Trailers also include 10,259 boat trailers, 1,673 tank trailers and 1,563 trailers for horse transport.

Nearly all vehicle categories include antique vehicles, totalling 3,282. Of them, 2,478 are passenger cars and 602 motorcycles.

# Product presentation: Statistics on motor vehicles

## Use of the statistics

---

Statistics on motor vehicles are needed for traffic, road and zoning planning, for forecasting traffic volumes, for formulating transport policy, for developing the legislation on motor vehicles, for strategic planning, and for market research. The statistics are used, for instance, by the Ministry of Transport and Communications, the Road Administration and enterprises at the national level and by local councils at the local level. In addition, international statistics, such as the Annual Bulletin of Transport Statistics for Europe published by the United Nations Economic Commission for Europe (ECE), make frequent use of these statistics.

## Definitions and classifications

---

The definitions used in the statistics derive from the legislation on motor vehicles. The classifications are based on international recommendations, mainly on those of the ECE. According to the Decree on Motor Vehicles, the concept "motor vehicle" in Finland only comprises automobiles, motorcycles and mopeds. Agricultural tractors, motor-driven industrial equipment and snowmobiles are called "motorized vehicles". This publication contains information on vehicles and on trailers subject to registration. Thus, the publication's title, *Motor Vehicles*, does not fully cover its contents. The data in the publication do not include the vehicles of the Finnish defence forces. Cars in the CD register are included since 1982.

## Data source

---

Statistics Finland receives the data on registered vehicles from the register of the Motor Vehicles Register Centre. The data are obtained via the Finnish State Computer Centre.

## Comparability

---

With a few exceptions, the data in these statistics are comparable across all the years for which data on motor vehicles have been compiled.

When comparing data for different countries, it must be borne in mind that, in some countries, the term "motor vehicle" may refer only to automobiles, while in others it may also include motorcycles and in yet others mopeds as well (Finland) or any other motorized vehicles. Special automobiles may be partly classified as special vehicles, not automobiles; in most countries they are mainly included among cars and lorries.

## Coverage

---

The statistics cover registered motor vehicles. Mopeds are not subject to registration in Finland. The number of mopeds in table A is the number of traffic-insured mopeds.

## Errors and defects

---

The quality of the statistics depends on the quality of the register of motor vehicles. The register contains some incomplete information, e.g. codes for the country of origin or the make may be missing or invalid. These are usually classified as "other".

With the revision of the motor vehicle registration system in 1989, the register's data content improved. However, the content of some variables should be more detailed. There is e.g. only one code (yes/no) for low-exhaust vehicles and several different international standards.

Information about the number of seats in cars and buses is missing from the present publication. We hope that it can be included again in the future.

## Unpublished tables, availability of the data

---

Unpublished tables can be obtained as photocopies subject to charge. The following tables have not been published:

- vehicles by province and municipality according to motive power (gasoline/diesel)
- vehicles according to a detailed classification by type
- vehicles according to make (all makes)
- vehicles by type according to intended use and motive power
- automobiles and motor cycles by age (all years) and vehicles by possessionary relation

All the tables in this publication as well as the unpublished tables are also available for first registrations in 1991.

Statistics Finland supplies custom-made special compilations of these data subject to a charge. Data on registered vehicles can also be combined with other data (population, enterprises, road accidents etc.). Statistics Finland only releases data at aggregate level. Names and addresses from the register of motor vehicles are sold by the Finnish State Computer Centre.

## Taulukot *Tables*

# Moottoriajoneuvot 1991

Motor Vehicles in Finland

”Moottoriajoneuvot 1991” sisältää tietoja 31.12.1991 rekisterissä olleista ajoneuvoista ja vuoden 1991 ensirekisteröinneistä.

Aikasarjoissa on esitetty tietoja mm. rekisteröityjen ajoneuvojen määrästä vuosina 1922-91 ja ensirekisteröintien kehityksestä 1960-91.

Tilasto sisältää kunnittaiset rekisteröityjen ajoneuvojen määrät ja henkilöautotiheydet kunnittain 1000 asukasta kohti sekä suosituimmat merkit ja niiden ensirekisteröinnit.
