

Regional statistics on entrepreneurial activity

2013, preliminary data

Value added in manufacturing increased in 2013

According to Statistics Finland's preliminary data, the gross value of output was EUR 119 billion in all manufacturing (BCDE) in year 2013. The gross value decreased in all main industries of manufacturing. The value added in all manufacturing was, however, the same as one year previously, i.e. EUR 29 billion. This was achieved as in manufacturing (C) the electrical and electronics industry in particular cut costs and improved margins, which resulted in higher value added.

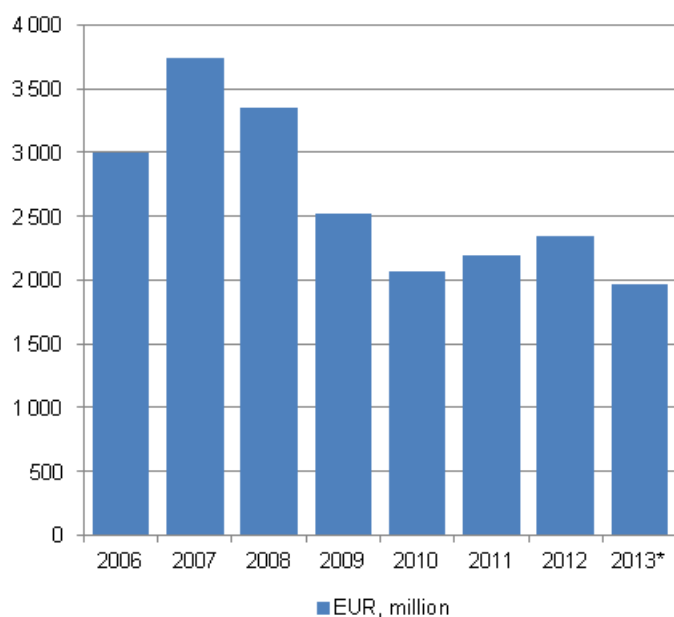

Value added in manufacturing (TOL C) in 2012 to 2013*, EUR 1,000

	2012	2013	Change, %	Change, EUR
Manufacturing, total	23 554 035	24 651 589	4,7	1 097 554
Food	2 597 760	2 494 707	-4,0	-103 053
Textile, clothing and leather	380 017	364 609	-4,1	-15 408
Forest	3 532 824	3 818 665	8,1	285 841
Chemical	4 194 934	3 910 034	-6,8	-284 900
Metal	10 712 000	11 986 044	11,9	1 274 044
of which electrical and electronics	1 648 599	2 860 367	73,5	1 211 768
Other manufacturing	2 136 500	2 077 530	-2,8	-58 970

*preliminary data

In manufacturing (TOL C), net investments in tangible assets like buildings, machinery and equipment decreased from the previous year and amounted to EUR two billion.

Net investments in manufacturing (TOL C), EUR million

*preliminary data

The regional statistics on entrepreneurial activity describe the activity of establishments of enterprises operating in Finland by industry and region. The preliminary statistics have a less extensive content than the final statistics and they describe manufacturing industries.

Statistics Finland has renewed its production of business statistics. In connection with the renewal, uniform industries have been taken into use in all business statistics. Therefore, the time series of these statistics are not in all respects fully comparable.
