VÄESTÖNMUUTOS- JA VÄESTÖRAKENNEKERTOIMET LÄÄNEITTÄIN,  
SEUTUKAAVA-ALUEITTAIN JA KUNNITTAIN 1979

Väestönmuutos- ja väestörakennekertoimia on julkaistu vuodesta 1974 lähtien. Lisäksi vuosien 1972 ja 1973 kertoimet ovat saatavina Tilastokeskuksesta.

Julkaistavat kertoimet ovat seuraavat (numero viittaa sarakkeiden numerointiin):

1. Ylin rivi: Yleinen syntyneisyysluku; elävänä syntyneitä keskiikäkiluvun 1 000 henkeä kohden.  
Toinen rivi: Kokonaishedelmällisyysluku. Luku ilmaisee, kuinka monta lasta 1 000 naista synnyttää voimassa olevien hedelmällisyyslukujen vallitessa koko hedelmällisyyskauteen olettaen, että kukaan heistä ei kuole ennen hedelmällisen kauden päättymistä.  
Kolmas rivi: Vuosien 1976-78 kokonaishedelmällisyyslukujen keskiarvo (esitetään vain kunnittain).
2. Yleinen kuolleisuusluku: kuolleita keskiikäkiluvun 1 000 henkeä kohden.
3. Maassamuuton tulomuutto: 15 - 44-vuotiaiden alueelle muuttaneiden lukumäärä promilleina vastaavasta keskiikäkiluvusta.
4. Maassamuuton lähtömuutto: 15 - 44-vuotiaiden alueelta poismuuttaneiden lukumäärä promilleina vastaavasta keskiikäkiluvusta.
5. Maassamuuton muuttotase: maassamuuton tulomuutto (sarake 3) miinus maassamuuton lähtömuutto (sarake 4).
6. Tulosiirtolaisuus: ulkomailta alueelle muuttaneiden 15 - 44-vuotiaiden lukumäärä promilleina vastaavasta keskiikäkiluvusta.
7. Lähtösiirtolaisuus: alueen 15 - 44-vuotiaiden maasta muuttaneiden lukumäärä promilleina vastaavasta keskiikäkiluvusta.
8. Siirtolaisuustase: tulosiirtolaisuus (sarake 6) miinus lähtösiirtolaisuus (sarake 7).
9. Koko muuttotase: maassamuuton muuttotase (sarake 5) plus siirtolaisuustase (sarake 8).
10. Ikärakenne 0-6: 0 - 6-vuotiaiden keskiikäkiluku prosentteina keskiikäkiluvusta.
11. Ikärakenne 0-14: 0 - 14-vuotiaiden keskiikäkiluku prosentteina keskiikäkiluvusta.

12. Ikärakenne 15-44: 15 - 44-vuotiaiden keskiväkiluku prosentteina keski-  
väkiluvusta.
13. Ikärakenne 15-64: 15 - 64-vuotiaiden keskiväkiluku prosentteina keski-  
väkiluvusta.
14. Ikärakenne 65+: 65 vuotta täyttäneiden keskiväkiluku prosentteina  
keskiväkiluvusta.
15. Ikärakenne 75+: 75 vuotta täyttäneiden keskiväkiluku prosentteina  
keskiväkiluvusta.
16. Keskiväkiluku: edellisen vuoden lopun väkiluvun ja tilastovuoden  
lopun väkiluvun aritmeettinen keskiarvo.
17. Sukupuolirakenne: 15 - 44-vuotiaita naisia sataa 15 - 44-vuotiasta  
miestä kohden.

Lisäksi Tilastokeskuksessa on saatavissa seuraavat kertoimet:

18. Ikärakennekerroin 45+: 45 vuotta täyttäneiden keskiväkiluku  
prosentteina keskiväkiluvusta.
19. Hedelmällisyysindeksi: alueen yleinen hedelmällisyysluku verrat-  
tuna koko maan yleiseen hedelmällisyyslukuun (koko maa = 100).
20. Kuolleisuusindeksi: alueen yleinen kuolleisuusluku verrattuna  
koko maan yleiseen kuolleisuuslukuun (koko maa = 100).
21. Tulomuuttoindeksi: alueen tulomuutto (maassamuuton tulomuutto sekä  
tulosiirtolaisuus) verrattuna koko maan vastaavaan lukuun (koko  
maa = 100).
22. Lähtömuuttoindeksi: alueen lähtömuutto (maassamuuton lähtömuutto sekä  
lähtösiirtolaisuus) verrattuna koko maan vastaavaan lukuun (koko  
maa = 100).
23. Nettomuuttoindeksi 2: vuoden lopun 16 - 45-vuotiaiden väkiluvun suhde  
edellisen vuoden lopun 15 - 44-vuotiaiden väkilukuun vähennettynä ti-  
lastovuoden kuolleisuudella.
24. Yleinen hedelmällisyysluku: elävänä syntyneiden lukumäärä promilleina  
15 - 44-vuotiaiden naisten keskiväkiluvusta.
25. 45 vuotta täyttäneiden kuolleisuus: 45-vuotiaana tai sitä vanhempina  
kuolleiden lukumäärä promilleina 45 vuotta täyttäneiden keskiväkilu-  
vusta.

Kertoimia käytettäessä on huomattava, että vuotuisen satunnaisvaihtelun vai-  
kus väestönmuutuskertoimiin on sitä suurempaa mitä pienemmille väestömää-  
rille kertoimet on laskettu. Empiirisen tarkastelun antamien tulosten mu-  
kaan alle 10 000 asukkaan kunnille laskettuja kertoimia ei voida pitää niin  
luotettavina, että voitaisiin puhua syntyneisyyden tai kuolleisuuden tie-  
tystä tasosta kunnassa yhden vuoden lukujen perusteella. On kuitenkin kat-  
sottu aiheelliseksi julkaista vuosittaisia väestönmuutuskertoimia sellai-  
senaan myös alle 10 000 asukkaan kunnille, koska ne ovat käyttökelpoisia,  
jos tarkastellaan useamman peräkkäisen vuoden lukuja samanaikaisesti. Näin  
on hyvä menetellä myös suurempien kuntien osalta.
