## To the reader

The history of the Finnish statistical institute extends all the way to the mid-1700s, when the oldest continuous population statistics in the world were initiated. The story of Statistics Finland starts with the establishment of the Statistical Office of Finland 160 years ago, and therefore we are celebrating now.

**Finland in Figures 2025** provides a review from the past to the present and shows all statistical topics compiled in Finland. We collect statistical data from existing public administration registers, but we also employ inquiries to organisations, households and citizens.

By participating in our inquiries and responding to our data collections you help us produce high-quality statistics that support decision-making, research and social debate.

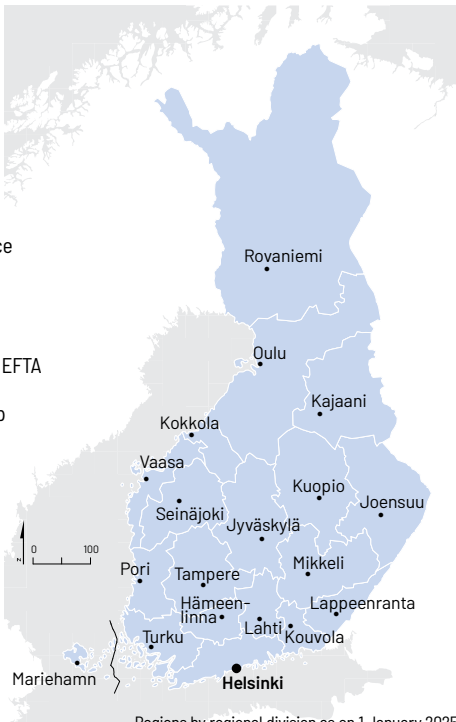

Reliable data cannot be generated from scratch, but each and every response is important.

## Geographical data

### Finland's area, 1 January 2025, km<sup>2</sup>

Area	338 491
Land area	304 000
Fresh water	34 491
Sea water	52 416
Total	390 906

### Boundaries, km

Sweden	614
Norway	736
Russia	1 344
Territorial water boundaries	1 250
Total	3 944

### Greatest length, km

Hanko-Utsjoki	1 157
---------------	-------

### Greatest width, km

Närpiö-Illomantsi	542
-------------------	-----

### Highest point, m above sea level

Halti	1 324
-------	-------

### Longest river, km

Kemijoki	500
----------	-----

### Largest lakes, km<sup>2</sup>

Saimaa	1 393
Päijänne	1 082
Inarijärvi	1 082
Oulujärvi	912
Pielinen	895

### Largest islands, km<sup>2</sup>

Sea	
Mainland Åland	689
Kemiönsaari	545
Inland waters	
Soisalo	1 540

### Lakes

estimate

# 168 000

with an area of 500 m<sup>2</sup>  
or more

of which

# 57 000

with an area of over one  
hectare

### Highest temperature 2024

# 31.4 °C

Kuopio, Savilahti and  
Heinola, Asemantaus

### Lowest temperature 2024

# -44.3 °C

Enontekiö airport

## Gross domestic product, 1975–2024\*

Value of total output calculated per inhabitant in a certain period  
Volume series, reference year 2015

Gross domestic product (GDP at market prices) describes the final result of the production activity of resident production units. The change in GDP is commonly used as an indicator describing economic growth, that is, the development of the total volume of goods and services produced in the national economy.

GDP 2024 preliminary data

Statistics Finland  
1865 - 2025

Statistics describe life, summarise our everyday life and capture the development of society.

Through statistics you can get an idea of how we – Finland, you and I – are doing.
