## Alkusanat

Täten julkaistava vuoden 1971 talonrakennustilasto on laadittu samoja pääperiaatteita noudattaen kuin lähinnä edellisten vuosien talonrakennustilastot.

Aineiston käsittely on johtanut aktuaari *Reijo Lilius*. Laadintatyön on suorittanut tilastonlaatija *Margareta Gretschaninoff*.

Helsingissä, Tilastokeskuksessa toukokuussa 1973.

## Förord

Den statistik över husbyggnadsverksamheten år 1971 vilken här publiceras, har uppgjorts enligt samma huvudprinciper som husbyggnadsstatistiken för de närmast föregående åren.

Bearbetningen av materialet har övervakats av aktuarie *Reijo Lilius*. Statistiken har uppgjorts av statistikförare *Margareta Gretschaninoff*.

Helsingfors, Statistikcentralen i maj 1973.

Aaro Kenttä

*Aarre Sahavirta*

## 1. Johdanto

Tässä julkaistava talonrakennustilasto vuodelta 1971 on jatkoa aikaisemmin Tilastokatsauksissa 1956:5, 1957:4, 1958:4, 1959:4 ja 1960:4 sekä erillisissä julkaisuissa sarjassa Suomen virallinen tilasto XVIII C julkaistuille vastaaville tilastoille. Tämä julkaisu sisältää tietoja vuoden 1971 aikana myönnetystä rakennusluvista, valmistuneista rakennuksista sekä keskeneräisistä rakennustöistä. Myöskin esitetään uusien rakennusten tuotantoa kuvaavia arvo- ja volyymitietoja.

Tämän julkaisun lisäksi Tilastokeskus julkaisee talonrakennustoimintaa koskevia ennakkotietoja neljännesuosittain monisteina sekä Tilastokatsauksissa. Myönnettyjä rakennuslupia koskevia tietoja julkaistaan monisteina kuukausittain. Samaan aineistoon perustuvan asuntotuotantotilaston vuodelta 1971 julkaisee Tilastokeskus erillisenä julkaisuna.

## 2. Tilaston laadintaperiaatteet

Talonrakennustilastoa varten kerätään tiedot rakennuskohtaisina talonrakennustilaston peruslomakkeella. Tilastoon sisältyvät kaikki ne rakennukset, joita varten vaaditaan rakennuslupa. Tiedonantajina toimivat kaupunkien maistraatit, kauppaloiden järjestösuhteudet ja maalaiskuntien rakennuslautakunnat.

Rakennusten ryhmittelyssä käyttötarkoituksen mukaan on tuottanut vaikeuksia se, että rakennusten eri osia käytetään eri tarkoituksiin. Tällöin on ohjeena pidetty sitä, että rakennus sijoitetaan kokonaisuudessaan siihen ryhmään, mihin suurin osa rakennusta kuuluu.

Rakennusten käyttötarkoitukseryhmittelyssä on pyritty erottamaan asuinrakennukset omaksi ryhmäkseen siten, että esim. julkisten rakennusten yhteydessä olevat toimihenkilöille tarkoitettut asuinrakennukset luetaan asuinrakennusten ryhmään. Samoin teollisuus- ja liikeyritysten rakentamat asuinrakennukset on luettu asuinrakennusten ryhmään.

Maatalouden rakennukset on jaettu kahteen ryhmään, joista kotieläinrakennuksiin luetaan navetat, tallit, kanalat yms. rakennukset, joita käytetään kotieläinsuojina. Ns. kylmät rakennukset kuten esim. aitat, puimalat jne. on sijoitettu muiden maatalousrakennusten ryhmään.

## 1. Inledning

Den husbyggnadsstatistik för året 1971, som här framlägges, motsvarar de uppgifter, som tidigare presenterats i Statistiska översikter 1956:5, 1957:4, 1958:4, 1959:4 och 1960:4 samt för de senaste åren i häften inom serien Finlands officiella statistik XVIII C. Föreliggande häfte innehåller uppgifter om under året 1971 beviljade byggnadstillstånd, färdigställda byggnader och igångvarande byggnadsarbeten. Därjämte framlägges volym- och värdeuppgifter om produktionen av nya byggnader.

Statistikcentralen publicerar också kvartalsvis förhandsuppgifter om husbyggnadsverksamheten både i duplicerad form och i Statistiska översikter. Uppgifter om beviljade byggnadstillstånd publiceras månatligen i duplicerad form. På basen av samma uppgiftsmaterial publicerar Statistikcentralen statistik över bostadsproduktionen år 1971 i en skild volym.

## 2. Uppgörandet av statistiken

Uppgifter för husbyggnadsstatistiken insamlas på husbyggnadsstatistikens basformulär. För varje byggnad ifylles ett skilt formulär. I statistiken ingår alla byggnader, vilka fordrar byggnadstillstånd. Uppgifterna lämnas om städerna av magistraterna, om köpingarna av ordningsrätterna och om landskommunerna av byggnadsnämnderna.

Svårigheter uppstår vid grupperingen av byggnaderna enligt användningssätt i de fall, där en byggnad olika delar kan användas för skilda ändamål. Vid grupperingen har principen varit, att byggnaden i sin helhet förs till den grupp, till vilken största delen av byggnaden kan anses höra.

Vid grupperingen av byggnaderna enligt användningssätt har man försökt sammanföra samtliga bostadsbyggnader till en egen grupp sålunda, att t.ex. även bostadsbyggnader för personalen och vilka uppförts i samband med offentliga byggen, föres till gruppen bostadsbyggnader. Likaså föres av industri- och affärsföretag uppförda bostadsbyggnader till gruppen bostadshus.

Jordbruksbyggnaderna har uppdelats i två grupper. Den första omfattar byggnader för husdjur, d.v.s. ladugårdar, stall, hönshus och andra byggnader, som användes för att hårbärga djur. S.k. kalla byggnader, t.ex. lider, rior, o.d. ingår i gruppen övriga ekonomiebyggnader.

Teollisuusrakennuksiin on luettu paitsi varsinaisia tuotantolaitoksia myös teollisuuden korjaamot, varastot, autosuojat, hallintorakennukset, sosiaalisia tarkoituksia palvelevat rakennukset jne.

Liikerakennuksiin on luettu kauppaa, liikennettä ym. elinkeinoja palvelevat rakennukset kuten myymälä- ja konttorirakennukset, ravintolat, hotellit, liikesaunat, huoltoasemat ja liikevarastot. Tähän ryhmään on luettu myös useimmat käsityöliikkeen harjoittamiseen käytetyt tilat.

Koulut ja sairaalat muodostavat omat selvät ryhmänsä. On kuitenkin huomattava, että ne eivät kaikki ole julkisin varoin rakennettuja, vaan että myös yksityisten yhdistysten, säätiöiden yms. rakennuttamat tämänlaatuiset rakennukset sijoitetaan ko. ryhmään.

Muihin julkisiin rakennuksiin on luettu valtion, kuntien, seurakuntien, seurojen, yhdistysten, säätiöiden yms. julkisluontoisia tarkoituksia palvelevat rakennukset. Tällaisia ovat julkiset virastot, kirkot, lasten- ja vanhainkodit, terveystalot jne. Tähän ryhmään sisältyy siis myös asumiseen käytettäviä tiloja.

Ryhmään muut rakennukset on sijoitettu sellaiset rakennukset, jotka eivät ole sopineet mihinkään edellisistä ryhmistä. Tällaisia ovat esim. kesämökit, omakotitalojen talousrakennukset, saunat, autotallit, varastot jne., jotka on rakennettu erillisiksi rakennuksiksi pääasiassa asuinrakennusten asukkaiden käyttöä varten.

Rakennusaineen mukaan on suoritettu jako kivi- ja puurakennuksiin. Jako on suoritettu sen mukaan, mistä aineesta rakennuksen kantavat seinärakenteet on tehty. Milloin samassa rakennuksessa on sekä kivi- että puuosaa, on rakennus kokonaisuudessaan luettu siihen ryhmään, mihin rakennuksen oleellisin osa kuuluu.

Rakennusten tilavuus on ilmoitettu kuutiometreinä ja sen mittaamisessa on noudatettu Suomen Arkkitehtiliiton Standardisointilaitoksen RT-korttiin 120.11 sisältyviä ohjeita. Rakennusala on siis mitattu seinän ulkopinnasta ulkopintaan ja korkeus kellarin lattiasta ullakon lattiaan.

## Talorakennustoiminnan volyymin ja arvon laskeminen

Talorakennustoiminnan tuotannon arvo kiintein hinnoin eli volyymi lasketaan ekstrapoloimalla perusvuoden arvoja volyyymi-indeksillä, joka lasketaan neljännesvuosittain. Volyyymi-indeksin laskennassa otetaan huomioon valmistuneiden rakennusten määrä sekä keskeneräisten rakennusten määrän muutos edellisen vuosineljänneksen lopusta seuraavan neljänneksen loppuun. Keskeneräiset rakennukset jaetaan perustus-, runko- ja sisätyövaiheissa oleviin. Kaikki vaihetiedot kerätään  $m^3$ :inä jotka vastavat valmiin rakennuksen tilavuutta. Kokonaiskustannukset  $m^3$ :ä kohti on jaettu eri rakennusvaiheiden osalle Valtion teknillisen tutkimuslaitoksen antamien tietojen perusteella. Volyyymi-indeksin laskentakaava on seuraava:

$$Q_{ot} = \frac{\sum_j B_t^{ij}}{\sum_j B_0^{ij}}$$

missä

$$B_t^{ij} = P_0^{ij} \cdot V_t^{ij} + \sum_s P_0^{ijs} (K_t^{ijs} - K_{t-1}^{ijs})$$

där

Till gruppen industribyggnader hör utom egentliga produktionsinrättningar även industriföretags reparationsverkstäder, lagerbyggnader, garage och förvaltningsbyggnader jämte byggnader för sociala ändamål.

Gruppen affärsbyggnader omfattar byggnader, som betjäna handeln, samfärdseln o.a.d. näringar. Som exempel kan nämnas butiks- och kontorsbyggnader, restauranger, hotell, offentliga badstugor, bilservicestationer och affärsföretags lager. Till gruppen hör även största delen av hantverksföretagens utrymmen.

Skolorna och sjukhusen bildar grupper som klart skiljer sig från andra byggnader. Här må framhållas att alla skolor och sjukhus inte uppföres med offentliga medel. I nämnda grupper ingår sålunda även byggnader, som uppförts av enskilda föreningar, stiftelser, m.m.

I gruppen övriga offentliga byggnader ingår de byggnader, som uppföres av staten, kommuner, församlingar, föreningar, stiftelser m.m. för ändamål av offentlig karaktär. Bland byggnader av denna art kan nämnas ämbetsverk, kyrkor, barn- och ålderdomshem samt hälsovårdsbyggnader (utom sjukhus). I gruppen ingår sålunda även utrymmen, som användes för bostadsändamål.

Gruppen övriga byggnader omfattar byggnader, som inte passar in i någon av de föregående grupperna. Som exempel kan nämnas sommarstugor, ekonomiebyggnader i samband med egna hem, badstugor, garage, lager o.a.d., vilka uppförts som fristående byggnader för att i huvudsak betjäna invånare i bostadsbyggnader.

På basen av byggnadsmaterialet har en uppdelning i sten- och trähus företagits. Uppdelningsgrunden gäller materialet i byggnadens bärande väggar. Om en byggnad består av en sten- och en trädel, har byggnaden i sin helhet förts till den grupp till vilken dess väsentligaste del hör.

Byggnadernas volym har uppgivits i kubikmeter. Vid beräkandet av volymen har man följt reglerna i Finlands Arkitektförbunds Standardiseringsinstitutets BI-kort 120.11. Detta innebär, att byggnadsarealen mäts mellan väggarna yttre ytor och höjden mäts från källargolvet till vindsgolvet.

## Beräkandet av husbyggnadsverksamhetens volym och värde

Husbyggnadsverksamhetens produktionsvärde till fasta priser, d.v.s. dess volym, beräknas genom att extrapolera basårets värden med en volymindex, som beräknas kvartalsvis. Volymindexen beräknas på basen av kvantitetsuppgifter om de färdigställda byggnaderna och om förändringarna i kvantiteten av pågående byggnadsverksamhetens kvantitet från början till slutet av kvartalet. De pågående byggnaderna kan befinna sig i grundläggningsskedet, stomarbetsskedet eller inredningsskedet. Alla uppgifter om byggnadsskedena mätes i  $m^3$ -tal, vilka motsvarar den färdiga byggnadens volym. Totalkostnaderna per  $m^3$  har fördelats på de olika byggnadsskedena med ledning av uppgifter från Statens tekniska forskningsanstalt. Formeln för volymindexen är följande:

$V_t^{ij}$  = vuosineljänneksen t aikana käyttötarkoitukseen i ja rakennusaineesta j valmistuneiden rakennusten  $m^3$ -määrä.

$K_t^{ijs}$  = vuosineljänneksen t lopussa käyttötarkoitukseen i ja rakennusaineesta j rakennettavien sekä työvaiheessa s olleiden rakennusten  $m^3$ -määrä.

$P_o^{ij}$  = käyttötarkoitukseen i ja rakennusaineesta j rakennettujen rakennusten rakennuskustannukset  $m^3$ ä kohti perusajanjaksona o.

$P_o^{ijs}$  = rakennusvaiheen s vastaavat  $m^3$ -kustannukset perusajanjaksona o.

$V_t^{ij}$  = under kvartalet t färdigställda byggnader med användningssyftet i av byggnadsmaterialet j,  $m^3$ .

$K_t^{ijs}$  = byggnader med användningssyftet i av byggnadsmaterialet j, som vid slutet av kvartalet befinner sig i arbetskedet s,  $m^3$ .

$P_o^{ij}$  = byggnadskostnaderna per  $m^3$  under basperioden o för byggnader med användningssyftet i av byggnadsmaterial j.

$P_o^{ijs}$  = motsvarande byggnadskostnader per  $m^3$  för arbetskedet s under basperioden o.

$$\sum_s P_o^{ijs} = P_o^{ij}.$$

Uusien talonrakennusten tuotannon bruttoarvo käyvin hintojen lasketaan kertomalla laskennallinen  $m^3$ -määrä ao. vuoden  $m^3$ -hinnoilla. Hintakehityksen seuraamisessa käytetään rakennuskustannusindeksin lisäksi muita itsenäisiä tietoja nimenomaan ansiotason kehityksestä.

För produktionen av nya byggnader har bruttovärdet i löpande priser beräknats genom att multiplicera de föreliggande  $m^3$ -talerna med  $m^3$ -priserna för resp. år. Som mätare av prisutvecklingen har använts uppgifter från byggnadskostnadsindex och andra föreliggande uppgifter, i synnerhet om utvecklingen av förtjänstnivån.

### 3. Talonrakennustoiminta vuonna 1971

Seuraavat tekstitaulut ovat samantapaisia kuin aikaisemmissakin vuosiyhteenvedoissa esitetyt. Niiden tarkoituksena on esittää lyhyesti vuoden 1971 talonrakennustoiminnan tuotannon vertailu aikaisempiin vuosiin sekä antaa tietoja, jotka eivät tule esiin varsinaisessa taulukko-osassa.

### 3. Husbyggnadsverksamheten år 1971

Följande texttabeller motsvarar dem, som framlagts i tidigare årsredogörelser. De möjliggör en jämförelse av husbyggnadsproduktionen år 1971 med tidigare år och innehåller specialuppgifter, som inte framgår ur den egentliga tabellbilagan.

#### 3.1. Uuden talonrakennustoiminnan arvo ja volyymi vuosina 1964 – 1971

Taulukossa A esitetään uuden talonrakennustoiminnan tuotannon arvo vuosina 1964 – 1971 ja taulukossa B sen volyymikehitystä vuosina 1964 – 1971 osoittavat indeksisarjat.

#### 3.1. Nybyggnadsverksamhetens värde och volym åren 1964 – 1971

Tabell A visar värdet av produktionen i den husbyggnadsverksamhet, som gäller uppförandet av nya hus åren 1964 – 1971 och tabell B innehåller indexserier över motsvarande volymutveckling åren 1964 – 1971.

Valmistuneiden rakennusten kokonaiskuutiometrimäärän ja lukumäärän perusteella voidaan laskea valmistuneiden rakennusten keskimääräinen koko, mikä on esitetty taulukossa E. Keski-koko rakennustyypeittäin ja tilastoalueittain julkaistaan taulussa 6.

På basen av de färdigställda byggnadernas m<sup>3</sup>-volym och antal har uppgifterna om de färdigställda byggnadernas medelstorlek i tabell E beräknats. Medelstorleken enligt byggnadstyper och statistiska regioner framgår av tabell 6.

E. Vuosina 1956 – 1971 valmistuneiden rakennusten keskimääräinen koko, m<sup>3</sup>  
Medelstorleken av de byggnader som färdigställdes åren 1956 – 1971, m<sup>3</sup>  
Average size of buildings completed in 1956 – 1971, m<sup>3</sup>

Talonrakennustoiminnan painopiste ja rakenne voidaan määrittää monin eri tavoin. Eri panostekijöiden menekin arvioimiseksi ovat tärkeimpiä tietoja rakennusten m<sup>3</sup>-tilavuus ja työkohteiden lukumäärä. Taulukossa F esitetään vuonna 1971 valmistuneiden rakennusten tilavuuden ja lukumäärän jakautuma rakennusaineen, käyttötarkoituksen ja sijaintipaikan mukaan.

Husbyggnadsverksamhetens tyngdpunkt och struktur kan bestämmas på många olika sätt. För beräkningar rörande förbrukningar av vissa insatsposter är byggnadernas volym och antalet arbetsställen de relevanta uppgifterna. I tabell F framlägges fördelningen av de år 1971 färdigställda byggnadernas m<sup>3</sup>-volym och antal enligt byggnadsmaterial, användningssyfte och läge.

F. Vuonna 1971 valmistuneiden rakennusten m<sup>3</sup>-määrien ja lukumäärän suhteellinen jakautuminen kuntaryhmittäin rakennusaineen ja pääasiallisen käyttötarkoituksen mukaan, %

Den relativa fördelningen av de år 1971 färdigställda byggnadernas volym och antal enligt kommuntyp, byggnadsmaterial och huvudsakliga användningssyften, %

Distribution of cubic volume and number of buildings completed in 1971 by type of commune, building material and main use, %

### 3.4 Myönnetyt rakennusluvut

Taulukossa N esitetään myönnettyjen rakennuslupien m<sup>3</sup>-määrät vuosina 1952 – 1971. Yksityiskohtaisemmat tiedot ovat tauluissa 16 – 18.

### 3.4. Beviljade byggnadstillstånd

I tabell N framgår de beviljade byggnadstillståndens m<sup>3</sup>-volym åren 1952 – 1971. Detaljerade uppgifter finns i tabellerna 16 – 18.

N. Vuosina 1952 – 1971 myönnetyt rakennusluvut, milj. m<sup>3</sup>  
Åren 1952 – 1971 beviljade byggnadstillstånd, milj. m<sup>3</sup>  
Building permits granted in 1952 – 1971, million m<sup>3</sup>

1) Ml. vain ne talonrakennustyöt, jotka olivat kesken sen neljänneksen lopussa, jolloin ne oli aloitettu.

1) Inkl. endast de byggnadsarbeten, vilka icke slutfördes under det kvartal då de påbörjades.

1) Incl. only building works not completed during the same quarter as started.

### Summary

*The data on house construction in this volume are mostly a direct sequel to those published previously in the Bulletin of Statistics 1956:5, 1957:4, 1958:4, 1959:4, and 1960:4, and in the series XVIII:C of the Official Statistics of Finland. The*

*above text and the tables show the quality and quantity of house construction in 1971 mainly in terms of physical units. Table A also includes value data.*
