(RT 1972:18)Rahalaitosten anto- ja ottolainaus kasvanut n. 4 kertaiseksi  
vuodesta 1959

13-vuotiskaudella 1959-1971 ovat eri rahalaitosryhmien suhteelliset osuudet koko ottolainauksesta jonkin verran muuttuneet. Liikepankkien suhteellinen osuus on kasvanut noin 1 prosenttiyksiköllä ja osuuspankkien lähes 3 prosenttiyksiköllä. Säästöpankkien suhteellinen osuus on pudonnut noin 2.5 prosenttiyksiköllä ja osuuskauppojen säästökassojen noin 1 prosenttiyksiköllä. Muun muassa nämä tiedot käyvät ilmi Tilastokeskuksen julkaisemasta rahalaitosten anto- ja ottolainaustilastosta vuosina 1959 - 1971.

Tilastokeskuksen nyt julkaisema tilasto sisältää tarkistetut rahalaitosten kuukausittaiset anto- ja ottolainautiedot vuodesta 1959 vuoteen 1971. Tilaston sisältämät pitkät aikasarjat antavat tiivistetysti rahamarkkinatietoa esimerkiksi suhdanneseurantaan ja ennusteiden laatimiseen.

Aikasarja-aineistosta voidaan todeta rahalaitosten ottolainauksen kasvaneen 13 vuoden aikana markkamääräisesti lähes nelinkertaiseksi. Antolainaus puolestaan on kasvanut hieman voimakkaammin, yli nelinkertaiseksi. Eri rahalaitosryhmistä on keskimääräistä voimakkaammin kasvanut osuuspankkien ottolainaus, yli 4.5 -kertaiseksi.

Antolainauksen osalta on voimakkaimmin kasvanut kiinnitysluottolaitosten antolainaus, yli 5.5-kertaiseksi markkamääräisesti.

Liikepankkien ottolainauksen suhteellinen osuus, joka on vajaan 40 prosenttia koko ottolainauksesta, on 13-vuotiskaudella kasvanut noin 1 prosenttiyksiköllä. Voimakkaimmin on kasvanut osuuspankkien ottolainausosuus, lähes 3 prosenttiyksikköä. Säästöpankkien suhteellinen osuus on tarkasteltavalla ajanjaksolla vähentynyt noin 2.5 prosenttiyksiköllä ja osuuskauppojen säästökassojen osuus noin 1 prosenttiyksiköllä.

Antolainauksen osalta voidaan havaita kiinnitysluottolaitosten ja Postipankin kasvattaneen suhteellisesti muita enemmän antolainautaan. Kummankin suhteellinen osuus on kasvanut noin 2 prosenttiyksiköllä. Säästöpankkien suhteellinen osuus koko antolainauksesta on laskenut hieman yli kolme prosenttiyksikköä. Muiden rahalaitosryhmien osuudet ovat pysyneet lähes muuttumattomina.

Eri vaateiden osalta voidaan todeta lyhytaikaisten luottojen - vekseleiden ja shekkitililuottojen - suhteellisen osuuden vähentyneen huomattavasti kyseisellä tarkasteluajanjaksolla. Vekseleiden osuus koko antolainauksesta oli vuoden 1959 lopussa runsaat 20 prosenttia ja vuoden 1971 lopussa noin 13 prosenttia. Suhteellinen osuus on siis vähentynyt runsaat 7 prosenttiyksikköä. Myös shekkitililuottojen suhteellinen osuus on vähentynyt runsaalla kolmanneksella.

Myös ottolainauksesta on shekkitilien suhteellinen osuus vähentynyt, joskaan kehitys ei ole ollut aivan suoraviivaista. Shekkitilien osuus on suurimmillaan ollut 15.5 prosenttia ja pienimmillään vain 8.7 prosenttia.

RAHALAITOSTEN

ANTO- JA OPTOLAINAUS

VUOSINA 1959-1971

---

## ALKUSANAT

Tilastokeskus julkaisee nyt rahalaitosten anto- ja ottolainausta vuosina 1959-1971 koskevan tilaston.

Tilasto perustuu Suomen Pankin taloustieteellisen tutkimuslaitoksen keräämään ja Tilastokeskuksessa tarkistettuun aineistoon vuosilta 1959-1964, Suomen Pankin vuosina 1965-1970 kuukausittain julkaisemiin rahalaitosten anto- ja ottolainaustilastoihin sekä vuoden 1970 joulukuussa tapahtuneen tilaston siirron jälkeen Tilastokeskuksen keräämään ja julkaisemaan aineistoon.

Aikaisemmin kerättyihin rahalaitosten anto- ja ottolainaustietoihin on tehty joitakin parannuksia ja korjauksia, joten aikaisemmat ja nyt julkaistavat sarjat eivät ole keskenään täysin vertailukelpoisia.

Aineiston tarkistustyössä on käytetty hyväksi rahalaitosten tasetietoja.

Aineistosta on saatavissa myös seuraavat tiedot: prosenttiset muutokset edelliseen kuukauteen verrattuna, prosenttiset muutokset edellisen vuoden vastaavaan kuukauteen verrattuna, muutokset edellisen vuoden loppuun verrattuna sekä vastaavat prosenttiset muutokset.

Aineiston tarkistuksesta ja käsittelystä on vastannut aktuaari Tuulikki Lund. Aineiston tietokonekäsittelystä on vastannut suunnittelija Matti Holkkola.

## JOHDANTO

1. Rahalaitokset - 'yleisö'

Nyt julkaistava rahalaitosten antolainauusta yleisölle ja ottolainauusta yleisöltä vuosina 1959-1971 koskeva tilasto käsittää seuraavat rahalaitokset: Suomen Pankki, liikepankit, säästöpankit, osuuspankit, Postipankki, kiinnitysluottolaitokset ja osuuskauppojen säästökassat.

Lainansaaja- ja tallettajasektorina on 'yleisö', jolla tarkoitetaan yksityistä sektoria sekä rahoituslaitoksia pl rahalaitokset ja valtio. Yleisö-käsitteen ulkopuolelle jäävät siis yllämainitut rahalaitokset sekä valtio.
2. Vaateet

Antolainauksen osalta on tilastossa käytetty seuraavaa vaadejakoa: shekkiluotot, vekselit, muu lainananto, antolainaus yhteensä. Erä 'muu lainananto' koostuu rahalaitosten tase-erästä lainat. Eriin sisältyvät myös kaikki välitetyt luotot.

Ottolainauksen vaadejako on tilastossa vastaavasti: shekkitilit, muu ottolainaus, ottolainaus yhteensä. Erä 'muu ottolainaus' sisältää säästötilien, karttuvien tilien ja käyttötilien lisäksi myös erilaiset erikoistalletukset kuten indeksitalletukset, talletukset verohuojennustilillä ja korkeakorkoisilla tileillä, erilaiset määräaikaistalletukset sekä irtisanomisehtoiset talletukset.
3. Erot aikaisempiin tietoihin

Aikaisemmin julkaistuihin anto- ja ottolainaustietoihin on korjattu kunkin vuoden joulukuun luvut tilinpäätöstietoihin vertaamalla. Korjaus koskee lähinnä osuus- ja säästöpankkeja.

Postipankin osalta korjauksia on tehty sekä anto- että ottolainaustietoihin. Postipankin vanhoista antolainaussarjoista on poistettu erä 'yksityiset obligaatiot' ja lisätty tase-erä 'lyhytaikaiset sijoitukset'. Julkaisussa on lisäksi erillisenä tase-erä shekkitilit vuoden 1962 tammikuusta lähtien; aikaisemmissa julkaisuissa erä on sisältynyt muuhun lainanantoon.

Aikaisemmin julkaistuihin Postipankin ottolainaustietoihin on sisältynyt vuoden 1967 helmikuuhun asti vain varsinaiset talletukset. Nyt julkaistaviin tietoihin on lisätty yleisön shekkitilit Postipankissa aikana 1959-1967 tammikuu.

4. Vertailu luottokantatilastoon Antolainaustilaston ulkopuolelle jäävät luottokantatilastoon sisältyvä tase-erä 'kotimaiset ulkomaan rahan määräiset saatavat' sekä nimellisarvoisten obligaatioiden erillinen erä.

Ennen vuoden 1970 loppua ei luottokantatilastossa ole julkaistu rahoituslaitosten välisiä luottoja eikä valtion saamia luottoja. Antolainaustilastossa sen sijaan ovat mukana rahoituslaitosten, paitsi 1. kohdassa mainittujen rahalaitosten ja valtion, saamat luotot.

Luottokantatilastossa ovat luotonantajina antolainaustilastoon kuuluvien rahalaitosten lisäksi vakuutuslaitokset. Kansaneläkelaitos, kehitysluottolaitokset, palveluluottolaitokset, luottokaupan rahoituslaitokset ja valtio. Antolainaustilaston mukainen antolainaus oli vuoden 1970 lopussa runsaat 60 % luottokantatilaston koko luottokannasta.
